

KAYAK CARTS are a must for easily transporting your kayak from car to water's edge. Simply roll the kayak down to the water and off you go! All of the latest Hobie Kayaks can use "Plug-in" carts. "Plug-in" carts do just that...they plug right into the bottom of your kayak. Choose Standard or the "all-terrain" Hobie Trax version. The Hobie Trax cart has a sturdy stainless steel frame and pneumatic tires. This is a cart for rough ground or sand conditions, the best cart for crossing over soft sand. Some older models or other brands of kayaks may require the use of a cart that straps on.

HOBIE KAYAK CART "POST COLLAR/CLAMP KIT"

Collar clamps help to reduce the direct loading of the cart on your kayak's bottom / keel. Direct loads on hull bottoms can cause deformation of the kayak. Simply position the collar clamps on the cart posts to rest against the bottom of the scuppers. Tighten the allen bolt with the provided tool. Even loading on scuppers and hull bottom reduces hull-bottom deformation issues. Fits all year-models of Hobie plug-in carts. *Note: Be certain that the cart inserts clear through the kayak and protrudes into the cockpit / cargo area surface. Kayaks should never be left on carts for prolonged periods of time.*
