# HOBIE ALTER. SIX DECADES OF BUILDING MEMORIES

How did Hobie Cat creator Hobart “Hobie” Alter put us all on the water? He **STARTED** with **FUN**... then he kept on going. It wasn't about building boats. It was about building **MEMORIES**.

The “Flying H” logo is global shorthand for ease and performance on the water. As you'd probably guess, that sort of international reputation didn't happen overnight.

Like all good tales, the history of Hobie Alter started with a dream. In the 1940's, Hobie saw the bluff-lined coves of Laguna Beach as a setting for adventure. Skimboards, paddleboards, surfboards, skiffs... the locals took their homespun designs as far as they could. But Hobie envisioned lighter, more maneuverable ways to play in the waves.

In the space of a decade—and thanks to his introduction of the foam surfboard blank—his boards became the favored equipment for everybody from local heroes to world champions. Today, Hobie surfboards are found at retailers around the globe and under the feet of some of the best surfers around.

In the '60s, Hawaiian-style outrigger canoes had become common at spots like Malibu. Small catamarans were seen as well, but they were too unwieldy for single-handed beach launching. Hobie got to work with fellow beach boat aficionado Phil Edwards. They came up with a design that changed the face of sailing—the Hobie 14. Adding an elevated fabric trampoline, asymmetrical hulls and a high-speed rig, the fun quotient was upped by orders of magnitude. The design opened up high-speed sailing to just about anyone.

The Hobie 16 appeared quickly thereafter. Whip-fast and user-friendly, the 16 gained huge media acclaim and international attention. With its exotic profile, trapezes, and eye-catching sail graphics with themes like “Tequila Sunrise,” the Hobie 16 became the most popular one-design sailing multihull in the world. The Hobie Cat was here to stay. Nowadays, if there's a body of water big enough to have a name, there's an active Hobie fleet calling it home.

Soon enough, new Hobie models rolled out. The Hobie 18. The ultra-light Hobie 33 monohull. The Hobie Power Skiff. A veritable flotilla of kayaks. Hobie's reach grew by leaps and bounds: Skateboards, polarized sunglasses, apparel... all built around fun in, on, or near the water.

While the history is compelling, the Hobie name has never been more timely. Our groundbreaking introduction of the MirageDrive™ pedal-driven propulsion system is the key. With the paddle relegated to back-up status, it's hands-free fun on the water. And with a deep line-up of recreational, touring, fishing, and sailing kayaks, Hobie leads the way. Today, there's literally a Hobie for everyone.

There's hardly a fisherman alive who isn't familiar with the Hobie Fishing Collection, featuring the Hobie Mirage Pro Angler, a purpose-built platform perfect for getting into the mangroves, out to the kelp, or across the shallows to your favorite Monster Hole. And with 600 pounds of capacity, you can bring every tool in your kit. With a huge fleet of fishing kayaks, nobody matches Hobie's range of angling possibility.

**Whether it's kayaking, fishing, or sailing, Hobie has you covered. Welcome to the Hobie family. Go ahead. Build some memories.**

Note: Freight to dealers is not included in pricing.

**SAFETY TIP!**

**LIFE VESTS** Get a good, comfortable life vest and WEAR IT! A life vest does you little good stored on your boat, especially if you get tossed into the water and away from your boat. Accidents happen and by their nature, they happen when you are not prepared. A life vest can keep you afloat until you can rescue yourself or you can be rescued by others. In the worst cases when injuries or cold water are involved, your life vest can make all the difference! Be sure everyone onboard your boat wears a life vest too! Pass the word! Federal law now requires that all persons below the age of 13 must wear a life jacket while aboard a boat.

## HOBIE eVOLVE POWERED BY TORQEEDO

Whether you're augmenting your MirageDrive or using the Hobie eVolve as your primary power source, this quiet and efficient electric motor will dramatically expand your horizons. Maybe there's a ripping tidal current or a series of fast-flowing eddies that you must negotiate before reaching that pristine shoreline. Maybe it's a bay that's always been a *little* too far explore. Or maybe it's just been a long day and your tired muscles could use a break. Either way, the clean, quiet, eVolve system is there for you.

This tidy German-engineered electric motor kit fits any MirageDrive kayak and it comes with two mounting options—one midship, the other stern hung. With the Hobie eVolve, you can either maintain steady cruising speeds of two knots (motor only) for hours, or you can open the throttle for short sprints. Best yet, depending on your set-up, you can use the eVolve to augment your boat speed while also using your MirageDrive. And thanks to its cockpit-mounted Remote Throttle, you always know how much juice you have left in the system's 230wh Lithium-Manganese battery.

If you thought the MirageDrive made kayaking sweeter, wait until you try the eVolve system. Life only improves with power.

### KIT INCLUDES:

- Ready-to-go Mirage well-mounted Hobie eVolve
- All cables for the motor and throttle units
- All mounting hardware
- Assembly that integrates the motor with a Twist and Stow rudder
- Sealed/Waterproof Lithium-Manganese high-performance battery (charger included)
- Remote throttle system displays speed and distance information generated by an onboard GPS unit
- Magnetic safety key
- Waterproof fittings and cable connectors
- Corrosion-resistant materials ensure durability and performance
- Lightweight power: Total weight of installed kit is 18 lbs (8.16 kg) or less, depending on the configuration

## 2 FOR 1

**BOTH MOUNTS INCLUDED**

For all Mirage Series except no Rudder Mount for Pro Angler and Inflatables

### RUBBER POSITION MOUNT

The rudder-mounted eVolve is the ultimate tool for extending your range and exploration options. This slick system uses a lightweight aluminum assembly to easily integrate an eVolve motor with a Twist and Stow rudder. Pedal and motor; motor, or simply pedal. When off, the engine becomes your rudder or it can be brought on deck via the Twist and Stow controls. (Rudder Mount not included in kit for Pro Angler and Inflatables.)

### MIRAGE WELL MOUNT

A clever option for mounting the eVolve motor package is to swap out your MirageDrive for this electric unit. Just slot the well-mounted Hobie eVolve into any MirageDrive kayak and instantly enjoy powered propulsion. Ready to use fresh out of the box, the Mirage-mounted eVolve weighs a scant 6.4 pounds—that's 0.2 pounds less than the MirageDrive—and is built to take years of exploration and adventure.

### REMOTE THROTTLE

While the outboard might be transom-hung, the driver doesn't have to sit astern thanks to our Remote Throttle, which attaches via a RAM mounting unit (included) to provide throttle control from your favorite seating position. The LCD screen displays all the trip info you need (such as speed and range) while you're underway. For safety, the unit features a magnetic key-to-throttle connection; break this magnetic connection and the motor immediately stops.

### LITHIUM BATTERY

A lightweight, 6.6-pound, 230wh Lithium-Manganese battery (8Ah at 28.8V) powers the system's featherweight Torqeedo motor. The battery is buoyant and completely waterproof, ensuring safety and there-when-you-need-it performance. Its built-in GPS unit generates pertinent information such as speed and range.

# ST PERFORMANCE FINS ST OR ST TURBO!

**ST FINS** ...and you thought the Hobie MirageDrive was the most amazing propulsion system ever seen! Now you can make your Hobie MirageDrive a **SUPER PERFORMER!**

Hobie Mirage kayak users report as much as 10% increase in speed and more using ST TURBO Fins. But its not all about speed, you can get top end speed and a slower cadence for cruising (Less pedals per mile). All achieved with these larger and more efficient fin designs. Increase your performance or increase your fitness routine, you choose the fin that is right for you: Standard, ST or ST Turbo... low, medium or a higher gear! The standard fins, supplied with our kayaks, are the easiest pedaling fins, but many users feel that the standard fins do not offer enough resistance. This is very evident when using our sailing kits. The added power and speed of the sail often outpaces the standard fins (similar to pedaling a bike down hill in first gear). Want to go really fast? Add the ST TURBOs for sailing! The longer fins can also increase lateral resistance for sailing upwind.

These ST (Square Tip) designs will require a bit more effort to pedal. *The added effort is commonly compared to pedaling a bike up a slight incline.* In addition, the included fin tension screw allows adjustment to achieve lower end torque or top end speed to meet the desires of the pedaler.

ST Fins fit any Hobie MirageDrive. If you prefer the ST fin, order 2 per drive. The ST TURBO fins require longer masts. The ST TURBO fin kit comes with 2 fins, 2 masts and all needed fittings.

- 81193001** ST Fin / Single (Requires 2 per MirageDrive)
- 72065** ST TURBO Fin Kit Complete (Older SS or Set-screw Sprocket)
- 72066001** "V2" ST TURBO Fin Kit Complete (2009 - Threaded Sprocket)

## SIDEKICK AMA KIT

Whether you are a pro or a novice, you will enjoy the sense of security from the extra amount of stability offered by the SideKick ama kit. Great for use when sailing, fishing, standing when site fishing, shooting photos! The SideKick ama kit is simple, light weight and effective! The SideKick's cross arms adjust the float height with a simple "click-twist-click". Just like a paddle shaft adjustment. Three positions offer you high - medium - low positions. Set the floats high for cruising (less drag) or secondary stability. Use the medium or low settings for primary stability (less initial roll). Fine adjustments for float height are done by twisting the main crossbar within its mounts and tensioning with the fastening hardware. Set up and use right off the beach or disassemble and deflate to store inside the hull. Then assemble and inflate when you get to your dive or fishing spot. Inflation is simple. Just blow a few breaths into each float through their one-way valves. Valve cap unscrews for rapid deflation. Installs with 4 bolts using expanding nuts.

- 72062061** SIDEKICK +07 ADVENTURE MOUNTING ADAP PLATE SET
- 72062062** SIDEKICK - MOUNT KIT W/CENTER BAR

**SIDEKICK AMA KIT** Extra stability for your kayak. Fits all Hobie models and most other kayaks. Whether you sail, fish, shoot pictures, dive or just want to feel a bit more stable when using your kayak, the SIDEKICK AMA KIT will do it. Light weight and simple to install. The floats are inflatable.

# HOBIE BIMINI SUN SHADE

**72710** Mount fits all Hobie models and most other kayaks (3 piece expandable). Attaches with included (4) bolts and expanding nuts.

We all love the sun, but it can be a bit much at times. Protect yourself with a Hobie Bimini Sun Shade. The Bimini is easily attached to most Hobie Kayaks. With the Hobie mount installed, a simple flick of a finger can attach, adjust or remove the Bimini. It can be easily folded out of the way or set up to block the sun. Simple adjustments can tilt the shade from side to side or to different heights and angles for best protection from the sun's rays. Requires Hobie mount. The Hobie Mount will attach to just about any kayak. It extends or retracts for a perfect fit.

# HOBIE DODGER

The Hobie Dodger is a spray, cool breeze or sun shade for your lower body.

Deflect bow spray, block cool breezes and stay warmer in cold conditions.

Works like a small pop-up tent. Loops of bungee connect to the boat via small fittings installed along the rails. Small internal battens give the Dodger its shape. The Dodger extends aft to just in front of the pedaler. A Velcro strip seals up the center in front of the pedaler. The entire dodger folds forward to enter or exit the kayak, to make pedal adjustments or reach items in the cockpit. An access panel is built-in for using the sailing rig. A great combination when there is wind and spray!

Great for hunters, animal and bird watchers as the Dodger conceals your legs movement. The Hobie Dodger makes your kayak a sit-inside sit-on-top!

Installs in minutes initially, but installs in moments once the fasteners are in place. Packs away into a small stow bag 5" round by 24" long (1.8 lbs).

Or take the whole family out for a comfortable evening cruise. A lot of boat at a tremendous value, the Hobie Getaway is designed to withstand rigorous use and provide years of sailing enjoyment for the entire family. # SAIL KITS

## ADD SAILING TO YOUR HOBIE MIRAGE KAYAK EXPERIENCE!

**MIRAGE KAYAK SAIL RIG** Add sail power to Hobie Mirage Kayaks! (Fits all current models of Hobie Mirage Kayaks). The Patented MirageDrive pedal system allows you to pedal while sailing which helps you to maintain forward motion through turns and obtain higher speeds. Sail with ease maintaining excellent speed with or without pedaling while sailing. Easily pedal out to sail or pedal home when the wind is too light. Add a SideKick ama kit for additional stability if desired.

### HOBIE MIRAGE KAYAKS... THE ONLY KAYAKS THAT CAN DO IT ALL

Paddle kayaks do not have the necessary lateral resistance needed nor do they typically have a rudder for steering. Paddle kayaks require hands-on paddling which prohibits use of rudder and sail controls for sailing. The MirageDrive pedal system allows you to pedal out onto the water to sail and pedal back if needed. You can also pedal the boat through a tack (turn). The MirageDrive pedal system's fins act as a keel or centerboard when in the down position offering the lateral resistance needed for upwind sailing. Hobie Mirage kayaks are equipped

For top sailing performance, add the ST TURBO fin kit and larger rudder!

with a hand-controlled rudder. The MirageDrive allows hands to be free for sail and rudder controls. Two piece mast, sail, hardware, lines and durable storage bag included. Add the large rudder #81397001 for more responsive rudder control. Adventure models can add the dagger board for enhanced upwind performance.

**SAIL KIT** includes two piece mast, sail (20.25 sq ft.), lines, fittings and storage bag.

### ADVENTURE ISLAND CONVERSIONS

The Hobie Mirage Adventure (2007 model and newer only) can be converted into an Adventure Island! These kits allow you to add just the amas or go all the way to Adventure Island with the amas and sail combined. Great sailing performance and excellent stability.

The complete kit includes: A boomless, roller-furling sail rig with plenty of sail area for excellent performance, completely manageable from the cockpit with the pull of a line. Two retractable amas that fold up against the side of the boat for easy docking, maneuverability, and transport. All 2007 and newer model year Adventure Kayaks, including the Fish model, have inserts molded into the hull. The Adventure Island kit is loaded with additional standard features such as a daggerboard; large "Twist and Stow" rudder; Mast and Sail Cover; and an Aka/Daggerboard Bag.

**AIR-FLOW TELS** Trim your sails for optimum performance. Attached air flow over sails is critical. Air flow directions are indicated by these tell tails. Made of light weight rip stop nylon (Red / Green). Attaches to sails with waterproof adhesive disks.

**334** Set of 14

### SAILING TIP!

**SAIL POWER** Watch the sail in order to pay close attention to the trim or adjustment of the sail. When the front of the sail, just behind the mast, luffs or flutters in the breeze, you lose power. To start moving, pull the sail in just enough to stop the sail from luffing or turn the boat away from the direction the wind is coming from. There are also short ribbons hanging on either side of the sail called "tell tails". The tell tails react to air flowing over the sail and will help you see that the sail is pulled in too tight or too loosely. If you pull the sail too tight you will stall the sail power. The tell tail on the back side of the sail will drop or do circles. Ease the sail out until it luffs, then pull it in just a little until it stops luffing. You will adjust the trim whenever the wind changes direction or you change course. See more on "Learn to sail the Hobie way" on our website in our "Support" area at: <http://www.hobie kayaks.com/experience/learn.html>

## HOBIE TWIST-N-SEAL HATCHES

**HOBIE TWIST-N-SEAL HATCHES** have a better seal. The lids also hinge open, so you never lose the lid. Designed with a cork-screw-like mechanism for closure, a simple twist of the handle opens or closes the hatch. As the screw pulls down the hatch, you get a tight seal on the "O Ring" seal against the inner cylinder. The hatch seals around the edge of the cylinder and does not have to be held down against a flat surface to seal. This allows the hatch to seal even if the lid is partially open or tipped. Flip the handle into the recess to "lock" it closed. Available in 6" and 8" diameters. These hatches are now standard equipment on all Hobie Kayaks.

**KAYAK CARTS** are a must for easily transporting your kayak from car to water's edge. Simply roll the kayak down to the water and off you go! All of the latest Hobie Kayaks can use "Plug-in" carts. "Plug-in" carts do just that...they plug right into the bottom of your kayak. Choose Standard for light duty and solid surfaces, Heavy Duty for heavy loads and rough terrain or the "all-terrain" Hobie Trax "2" version which is the best over soft sand. Each cart has a sturdy stainless steel frame. Some older models or other brands of kayaks may require the use of a cart that straps on.

**CART KEEPER FEATURE** Standard on Hobie Plug-in carts! After insertion of the cart, pull the dome pin out and re-insert as shown to keep the cart captive.

**POST COLLAR / CLAMP FEATURE** Collar clamps help to reduce the direct loading of the cart on your kayak's bottom / keel. Direct loads on hull bottoms can cause deformation of the kayak. Even loading at scuppers and hull bottom reduces hull-bottom deformation issues.

*Note: Be certain that the cart inserts clear through the kayak and protrudes into the cockpit / cargo area surface. Kayaks should never be left on carts for prolonged periods of time.*

**KAYAK CART "PLUG-IN" STANDARD**

Light weight with durable tires and strong spoked wheels. Stainless steel frame. Wheels are easily removable for storage. Also includes cart keeper feature and cart clamps. This cart has the medium capacity. (150 lb Capacity)

**80045001 STANDARD CART**

**80045101 i - KAYAK CART**

i - kayak cart (not pictured) plugs into an inflatable's MirageDrive well.

**KAYAK CART - "PLUG-IN" HEAVY DUTY**

Highest capacity cart with very durable knobby wheels. Welded Stainless steel frame. Wheels are easily removable for storage. Also includes cart keeper feature and cart clamps. This cart has the highest capacity. (225 lb Capacity) Recommended cart for Pro Angler and Tandem Island.

**80046001 HEAVY DUTY CART**

**KAYAK CART "PLUG-IN" HOBIE TRAX "2"**

The Trax "2" Cart has 24 cm (blow-molded polyurethane) pneumatic tires. These tires have a high capacity and are very durable! This is the best all around cart for soft sand and uneven terrain. The tires are wide and can be deflated for better performance over softer sand and soil. Welded Stainless steel frame. Wheels are easily removable for storage. (176 lb Capacity)

**80044101 TRAX "2" CART**

**KAYAK CART - UNIVERSAL**

This cart attaches to any kayak via straps and buckles. Pneumatic wheels allow this cart to roll more easily over rough terrain. Padded "hull-centering" bunks keep the kayak centered on the cart while the tie down straps hold the cart firmly to the boat. Carries loads up to 150 lbs. Welded Stainless steel construction. Wheels are easily removable.

**80041 UNIVERSAL CART**

**MINI KAYAK CART**

An easy way to pull your kayak around. Durable and lightweight, it simply straps on to the hull and off you go. Stores neatly in your hull's cargo bay while you're paddling. Best on smooth surfaces, not all-terrain.

**72080 MINI CART**

**POST COLLAR / CLAMP KIT**

Collar clamps help to reduce the direct loading of the cart on your kayak's bottom / keel. Direct loads on hull bottoms can cause deformation of the kayak. Even loading at scuppers and hull bottom reduces hull-bottom deformation issues. Fits all year-models of Hobie plug-in carts.

**80044201 COLLAR / CLAMP KIT**

**HEAVY DUTY UPGRADE KIT \***

Standard plug-in carts can be upgraded to heavy duty wheels. May require removal of welded washer on some versions.

(\*Not designed to fit Trax cart frame)

# COVERS

**KAYAK COVERS** Protect your kayak from the effects of the weather, UV rays, dirt, leaves and birds. We have chosen four sizes to fit the entire line of Hobie Kayaks. These covers are easy to install or remove, fits over the hull (like a fitted sheet on a mattress). Straps and pull string adjust for a tight fit. Cross straps secure the cover on your hull for windy conditions. Heavy duty UV resistant canvas material in a neutral color for better aging. These covers fit over the hull when upright or upside down. To help prevent distortions to the hull bottom shape, Hobie recommends that our kayak hulls be stored upside down resting on the cockpit rails. This is also best for deflecting rainwater and prevents water pooling in the cockpit or on the cover. When planning to store a hull upright, be sure to properly support the hull bottom to prevent hull distortions.

**"WELL NUT" FASTENERS** are tubular rubber fittings with an imbedded brass nut in the base. These are similar to a molly screw commonly used in sheet rock. They expand within the structure and give you a virtual backing nut and washer in an area that is inaccessible. Well nuts can be used for mounting many accessories to kayaks. Simply drill a hole as a net-fit dimension for the well nut. Insert the nut and position the hardware to be fastened. Insert and thread in the screw. Tighten until very snug. The brass nut is drawn up against the inside surface of the kayak which expands the rubber to a dimension that is too large to pull through the hole.

# HOBIE KAYAK SUPPORT / ONLINE SUPPORT - FAQs - FORUMS

For technical help, contact your dealer, see the Hobie website support area or visit our Hobie kayak user forums.

Our on-line support area and forums include FAQs with many technical and user topics.

Hobie Cat Company [hobiekatyaks.com](http://hobiekatyaks.com) / Hobie Australasia [hobiecat.com.au](http://hobiecat.com.au) / Hobie Kayak Europe [hobie-kayak.com](http://hobie-kayak.com)

## HOBIE KAYAK FAQ

**How watertight is my boat?** It is normal for any type of kayak to experience a small amount of seepage due to the installation of rivets, hatches, etc. Kayaks may take on a few cups of water while out paddling. If a kayak is taking on more than a small amount of water, check to make sure the drain plug is in, then check the rest of the boat for leaks. Silicone can be used to seal the rivets. If you have any questions, please call your dealer.

**How should I store my kayak?** It is best to store your kayak upside down or standing on end. If hanging your kayak, do not support from the handles. Best supported by wide webbing straps with the kayak upside down or on its side.

**Is my boat repairable?** Hobie kayaks are very durable, however, on occasion they may need some minor repairs. Linear polyethylene is repairable. Check with your dealer concerning repairs for your kayak.

**Is my boat recyclable?** Hobie will recycle your boat when you are done with it. To recycle a Hobie Kayak, it must be cut up so it fits in a box with the following dimensions: may not exceed 130" for the length plus girth, and maximum 108" for the length. Ship the boat to: Hobie Cat 4925 Oceanside Blvd. Oceanside, CA 92056. It is our hope that no Hobie Kayak will ever end up in a landfill!

# Hobie®

# ENJOY THE RIDE

The Hobie MirageDrive is redefining how the world views inflatable kayaks. With the supplied pump, they inflate easily, deflate quickly, and are ideal for the kayaker who's short on space and storage. Packed in their own rolling travel bags, they fit easily in the trunk of your car, on your boat or in your RV - you can even take them on your next vacation.
