

Adjustable Rod Extender

- 1. Adjustable Rod Extender Assembly
- 2. Security Straps (2)
- 3. Padeyes (2)
- 4. #10 Sheet Metal Screws (4)
- 5. XL Screw in Padeyes (2)

Gimble Pin

The adjustable rod holder assembly comes with a gimble pin installed at the base. You can remove the pin with a flat head screwdriver if you do not want to use this feature.

Reel Holder

The reel holder at the top can be removed to allow for different styles of reels and angles of trolling. To adjust the reel holder:

①

Un-thread the red knob

②

Pull the reel holder out, rotate into the desired position and press back into the rod base.

③

Thread the red knob to secure the reel holder.

Rod Tube Angle Adjustment

The rod tube can be adjusted for optimal trolling angle or storage position. To adjust the rod tube:

①

Open the latch.

②

Rotate the rod tube to your desired angle.

③

Close the latch.

Anchor Straps

The provided anchor straps not only keep the rod holders tethered to the boat, but also prevent them from rotating if you are trolling. To install the anchor straps:

①

Screw the padeyes into the gunnels of your kayaks approximately 8" fore and aft of the molded in rod holder location.

①a

If you have screw-in padeyes on your kayak near the rod holders, you can also replace them with the provided XL padeyes. Remove the old padeye with a pair of pliers and thread in the new XL padeye.

③

Insert the rod holder into the molded-in rod holder on your boat and position it as desired. Snap the straps to the rod holder and to the padeye and tighten into position.
