## TECH TIP!

**Mast stepping** Usually a two person job. For those days you need help, want to single hand or be able to rig the boat alone for any reason, a mast stepping aid is what you need. The primary function of a mast stepping aid is to raise the mast while restraining side movement induced by a cross wind. Often it is more difficult to handle the side motion than it is to raise the mast. It's the side motion that breaks or bends the hinges and/or mast base castings.

**HOBIE MAST STEPPER** This system has a gin pole that rests on a foot attached to the trailer. The mast is stabilized by tying a trap wire on each side to the front cross bar. Attach the trailer's winch (not provided) to the forestay and hoist away. Utilizes bridles to stabilize the gin pole while hoisting the mast.

**3152** MAST STEPPER

**MAST STEPPER II** Easy to install because it eliminates the trailer mounted gin pole. However, the Mast Stepper II system does require that the trailer's forward mast support be 30" taller than the mast step. The mast is stabilized by tying a trap wire on each side to the front cross bar. The kit includes all necessary lines, shackles, blocks and instructions. Purchase winch separately.

**3155** MAST STEPPER II

**3153** Winch (900 lb. capacity) No line included\*.

\* Listed winch has a capacity of 40' of 3/16" cable or line - 30' of 3/32"

**HOBIE MAST STEPPER III** Specifically designed for the Hobie Getaway due to the rotated mast position when stepping. Can also be modified to work on Hobie 17, Tiger and 20. Step your mast with ease and safety. Specially designed bracket attaches to mast at base. A pole plugs into the bracket to create a gin pole arrangement that allows you to singlehandedly raise and lower your mast. It uses the trailer's winch (not provided) for power. Lines snap in place to eliminate side-to-side sway. Attaches quickly without tools. No modifications to boat. Can adjust to fit other rotated-position stepping masts.

**3156** HOBIE MAST STEPPER III

**3153** Winch (900 lb. capacity) No line included\*.

**EZ STEP™** As item above shows, a simple gin pole arrangement allows you to singlehandedly raise and lower your Hobie mast. It uses the trailer's winch (not provided) for power. Lines snap in place to eliminate side-to-side sway. Attaches quickly without tools. Adjusts to fit any catamaran.

**UNIVERSAL COVERS** This is designed to fit a variety of boat lengths, cut into general catamaran shape. It's made of tough woven polyethylene that is coated on both sides, one side silver, one side black. We've chosen this polyethylene because of its excellent resistance to ultra-violet degradation. It is a woven rather than sheet fabric to provide great tear strength. These covers will tolerate sun, wind, rain, high and low temperatures, and not fall apart. This fabric was specially designed for outdoor application. Install with silver side out.

Each cover is cut to be used for a boat length range. Tapes are sewn in place to allow you to secure the cover around the hulls and crossbars. Custom features such as cut outs or slits for wires or wings can be created with scissors. The edges will not catch, fray, or pull. We include 5 feet of adhesive backed velcro with each kit to be used to prevent slits from flapping in the breeze. *These covers are not designed to be used while trailering.*

**BOAT COVERS** Boat covers are designed to protect your boat from UV degradation and dirt. Universal storage covers are one piece and designed for easy installation. They fulfill their purpose mast up (with minor modification) or mast down, on the beach or on the trailer. The fabric is woven polyethylene that is film coated on both sides to cover the woven fabric. It has fantastic tear resistance and is specifically designed for outside use. UV tolerance is one of its major attributes.

**SNORKEL JIB COVER** Protect your roller-furled jib from attack by ultraviolet light and the weather. Easy to install and remove—the Snorkel is a must for protecting your expensive sail from eventual destruction by the elements. The Snorkel is a zip-on cover for roller-furled jibs. Made from durable fabric with a full length zipper. Snorkel covers are not intended for long term storage. Jibs must be furled tightly, have luff tension and be secure for windy conditions. Loose jibs and cover may cause chafing damage to sail.

**TECH TIP!**

**COVERS** Protect sails and hardware from sun and abrasion damage. Perhaps the greatest enemy of many modern fabrics is the sun's ultra violet radiation. It deteriorates nylon unless it's specially treated and it attacks dacron sail cloth and weakens it. Fortunately, nylon can be treated to make it UV tolerant and acrylic fabrics exhibit seemingly endless resistance to UV radiation. These sail bags and sail covers can be used to protect your dacron sails from UV radiation damage.

**COMPTIP COVER** Hobie Cat recommends that the Comptip portion of the mast be covered to protect it from ultraviolet rays. Our cover is made of UV resistance treated nylon. Ties on to the mast with line that is provided. Fits all Hobie Cats. Will not work with mast floats installed. Royal blue.

**TECH TIP!**

**HATCH COVER KITS** The small, 4" diameter, covers are hand sized and are often used behind the rear crossbar for access to the transom. The 5" diameter hatch covers are about the maximum size that the Hobie 14 and 16 foredeck can handle. The 6" access port kit is now a screw-in port, just like the 4" and 5". Prior to 1989, Hobie Cat used a pop-in port on the Hobie 18. Water would seep into the hulls through the rope-handle holes. Replacement with the screw-in ports eliminates that condition.

**HOBIE DRY BAG** New Hobie Dry Bag 8" diameter x 14". Now a standard feature in all Hobie Kayaks, this new dry bag is built of tough materials. Seals tight to keep your stuff dry.

**71703001** 8" Hobie Dry Bag

**8" TWIST-N-SEAL HATCH**

**HOBIE TWIST-N-SEAL HATCHES**

These new Hobie hatches are designed to have a better seal. The lids also hinge open so you never loose the lid. Designed with a cork-screw-like mechanism, a simple twist of the handle opens or closes the hatch. As the screw pulls down the hatch, you get a tight seal on the "O Ring" seal. Flip the handle into the recess to "lock" it closed. Available in 6" and 8" diameters. These hatches are now standard equipment on all Hobie Kayaks.

**6" TWIST-N-SEAL HATCH**

Available in 6" and 8" diameters. These hatches are now standard equipment on all Hobie Kayaks.
