

Tandem Mirage Sail Adapter

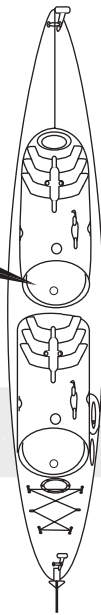

For serial numbers 1543
and smaller

Congratulations on purchasing the Tandem Mirage Sail Adapter Kit. Follow these simple installation instructions and you'll be out on the water in no time.

Step 1: Flip up front seat of kayak and insert adapter into scupper.

Step 2: Consult Sail Kit instructions for sail assembly.

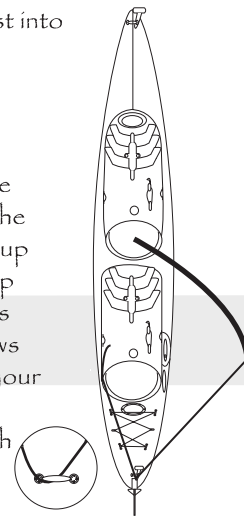

Step 3: Slide down haul hook up the bottom of the mast approximately 10 inches, then tighten screw to secure the hook. Once tightened, stretch bungee at base of sail onto the down haul hook.

Step 4: Slide mast into adapter.

Step 5: Run the main sheet from the sail side, through the rear pad-eye, and up through the left clip on your seat. This configuration allows you to steer with your right hand and control the sail with your left.
